Subject: RE: [External] NC electricity analysis

David,

Thank you for sharing. Would you or someone on your team have time to walk me through the highlights of the report and analysis? In person or by phone would work.

I'm open this Friday morning. Next week, I could do Monday morning, Wednesday afternoon or Thursday morning. I have other splotches of availability Thursday and Friday if needed.

If you want to drop off a copy, you can do so with the receptionist on the first floor of the Administration Building on Jones St.

Jeremy

Hey Jeremy,

It was good to see you last week at the EV event. I wanted to share with you an analysis we recently did on NC's electricity grid. We wanted to see if Duke could reliably meet the state's energy needs if they stopped investing in future fossil fuel projects, and if so how would that impact customers. Turns out that they could easily meet customers needs, and shifting in this direction would actually save customers money when compared to Duke's businesss as usual plan in their IRPs.

I know the Governor's office is keenly interested in energy, and that a number of people in the community have asked your office to consider putting together a statewide energy plan, so hopefully this can help inform that process if you y'all move forward with something.

[You can read the report here](#), but I wanted to drop off a hard copy as well. What's the best way to get that to you? Should I just drop off a copy at your office?

When you get a chance to look it over, I'd be happy to help answer any questions y'all might have.

Thanks,

--
